

MOBILE DEVICE POLICY

POLICY NO.	315-007
SCOPE	All Faculty, Staff and Administrators
APPROVAL	Senior Management Team
ORIGINAL DATE	September 1, 2011
LAST REVISION	September 1, 2011
NEXT REVISION	September, 2016
CONTACT	Director, Computer Services

1 PREAMBLE AND PURPOSE

In recognition of the fact that NSCAD University (“NSCAD”) requires certain employees to carry mobile cellular devices, this policy is designed to ensure that mobile cellular devices are used in the most cost-effective manner and help departments determine who is eligible and how they are to be used, as well as provide standardization of mobile device types and usage which reduces unnecessary support costs and ensures that any such device performs as expected in the NSCAD environment.

2 APPLICABILITY

This policy covers all cell phones, smart phones, pagers, tablet computers (including but not limited to iPads or Android tablets) and mobile data sticks (including but not limited to the Bell Turbo Stick or similar devices) and applies to all employees or other authorized representatives who have or are responsible for any mobile cellular device issued by NSCAD or conduct business on behalf of NSCAD while using any mobile cellular device..

3 REQUIREMENTS

Mobile cellular devices and plans will be provided based on job requirements but will only be considered for provision when the employee:

- supports mission-critical systems or provides critical campus services and is required to be reachable immediately both within and beyond normal business hours.
- is not normally present at a fixed workstation and provides nomadic support of which rapid response is often required.
- is in a role requiring frequent travel, mobile connectivity and rapid availability.
- demonstrates a need to have mobile access to critical information and documents.

A plan that allows for voice communication and the ability to receive text messages is standard. If the employee has a demonstrated need to have a texting and/or data plan as well, the approval of such plans will be at the discretion of the Vice-President in charge of the requesting area. **It should be noted that smart phones must carry an appropriate data plan to be active on the carrier's cellular network. This appropriate data plan requires funding.**

Mobile cellular devices will not be issued to student assistants, part-time employees, temporary employees, consultants, or other employees/contractors that do not have a compelling use for the technology in the opinion of the Vice-President responsible for the requesting area.

Computer Services will administer and negotiate mobile/cellular agreements on behalf of NSCAD. Computer Services has standardized mobile/cellular devices and service packages for use in the NSCAD environment. **Only those mobile cellular devices approved and issued by Computer Services will be authorized and supported.**

4 PROCEDURES

Employees requiring a NSCAD-owned mobile cellular device must first make the request of their immediate supervisor. Their immediate supervisor, if they approve of the use, will then forward the request to the Director of Human Resources, who will determine if there are any issues with granting the request with respect to any collective agreements to which NSCAD is a party. The Director of Human Resources will then forward the request to the Vice-President responsible for the requesting area and advise the Vice-President of any such issues. Should the Vice-President responsible for the requesting area approve the request, the Vice-President will email the Director of Computer Services stating what the employee requires. The Director of Computer Services will then contact the employee and advise of the most effective plan and available equipment.

5 APPROPRIATE USE

Loss or theft of a NSCAD-owned mobile cellular device must be reported immediately to the employee's immediate supervisor and the Director of Computer Services, who will request that the service for that device be suspended.

Employees should use discretion in relaying confidential information on mobile cellular devices as transmissions are not secure. As well, there should be no expectation of privacy as the employee's superiors can review the charges on any bill for service.

Use of any NSCAD-owned mobile cellular device is governed by NSCAD's Acceptable Use Policy for University Computing Resources.

In accordance with the Personal Information International Disclosure Protection Act, S.N.S. 2006, c. 3 (as amended), transporting any NSCAD-owned mobile cellular device outside Canada must be considered carefully. “The personal information held by public bodies [of which NSCAD is one]... may be transported temporarily on, or accessed from the laptop computers, cell phones, and other electronic devices (e.g. blackberries), outside Canada if the head of the organization determines it is necessary to meet the operational requirements of the organization, or is necessary for the work of the employees.” (Government of NS PIIDPA FAQ)

The employee’s immediate supervisor may deactivate a mobile cellular device and terminate related services at any time. However, termination fees may exist and will be the responsibility of the employee’s department. The Director of Computer Services may be consulted to identify such costs.

Upon termination or resignation of an employee, the device and its associated service number (if any) remain the property of the former employee’s department and may be reassigned or terminated.

When discarding or reassigning mobile cellular devices, the device must be cleared of data.

Unless authorized, any enhanced services such as downloading songs or applications, texting, using the World Wide Web for personal use or any features that would incur additional monthly costs are not permitted.

NSCAD recognizes that cell phones may be used for incidental personal use. Any charges that include significant personal usage including roaming, long distance charges, airtime, data and texting will require the employee to reimburse NSCAD.

No activity that violates the manufacturer’s warranty such as but not limited to “jailbreaking” will be permitted on NSCAD-owned devices.

6 VOICE, DATA AND TEXTING PLANS

To take advantage of volume pricing and discounts, Computer Services will select contracted rates for voice, data and texting plans.

Plans will be selected based on employee requirements and will not consider personal use as a factor. Standard services should include call display, message centre/voice mail and the ability to receive text messages.

Computer Services is available to provide consulting and advisory services in selecting optimal plans.

To activate certain mobile cellular devices such as smartphones or certain tablets on the cellular provider's network, it must carry an appropriate data plan.

To reduce the operating cost of mobile cellular devices that have the ability to use wireless networking (also known as Wi-Fi), when on campus, these devices should be configured to use Wi-Fi wherever possible.

NSCAD's standard cellular plans are not designed for wireless laptop connections using a mobile cellular device (also known as "tethering"). If tethering is required for university use, then the user and the Vice-President responsible for the area will work with Computer Services to determine the most effective tethering/laptop wireless plan.

7 INTERNATIONAL TRAVELLING

NSCAD's standard plans for voice, data and texting are designed for use only within Nova Scotia and Canada. Usage outside these areas will result in additional charges, and these charges can be quite substantial.

To reduce these costs, various voice, data and texting plans may be added when required. Prior to traveling, the mobile cellular device user must contact the Vice-President responsible for the area for approval. After approval, the mobile device user must arrange with Computer Services to have the appropriate plan added.

8 BILLING, CHARGES AND REVIEW

All costs associated with NSCAD-owned mobile cellular devices will be allocated to the appropriate department. The department must have funds in their budget set aside for this purpose.

9 REIMBURSEMENT

Employees may be reimbursed for NSCAD business calls made on their own mobile cellular devices; however, cellular access charges or other monthly recurring charges are the responsibility of the employee and will not be reimbursed by NSCAD unless approved in advance by the Vice-President responsible for the user's area.

In order to be reimbursed, the following conditions must be met:

- Department pre-approval by the Vice-President responsible for the area.
- A payroll reimbursement requisition for the reimbursement approved by the appropriate person.

- A copy of the detailed cellular phone bill showing the call detail. If the copy of the bill does not show to whom the call was placed, NSCAD may request further information.

No reimbursement will be made to employees for business calls made on their personal mobile cellular device if they do not incur additional direct costs, such as exceeding their monthly allocation of data or minutes.

10 DATA SECURITY

Mobile cellular devices, particularly smartphones and tablet computers, can hold confidential NSCAD information such as email or other electronic documents. As a result, steps should be taken to secure **ANY** mobile cellular device including but not limited to those mobile cellular devices not owned by NSCAD upon which confidential NSCAD information may be stored. Users of such mobile cellular devices must, at a minimum, configure such mobile cellular devices to require a passcode to unlock the device before use.

11 QUESTIONS

Any questions regarding this policy should be directed to the Computer Services department.
