

**BIO**

Jim Mullan
Project Manager
Bird Construction

Jim is an Architectural Engineering Technician who has been working in the construction industry for more than 15 years. He developed a passion for removing the physical barriers in our built environment while providing care for individuals with mobility and cognitive challenges through his work in a rehabilitation facility. This experience moved him to pursue a career in design and construction. After several years in the construction industry, Jim experienced a life-changing event when he was paralyzed and diagnosed as an incomplete quadriplegic. After a long and unlikely recovery, Jim is walking again and back to work full time in the construction industry where he continues to champion much-needed changes to our built environment.
